— Ground truth —●— TimeMixer H=96 —▲— TimeMixer H=336
— UVHF (one model) —■— TimeMixer H=192 —◆— TimeMixer H=720

MSE vs TimeMixer

H96: -12.5% H192: -32.8% H336: -13.2% H720: -38.5%

Mean cross-horizon disagreement: TimeMixer 1.77 units | UVHF 0 (identical prefixes)

MSE uses each complete horizon; disagreement averages 6 pairs over their full overlaps. Selected case, not a population estimate.
