Ground truth TimeMixer H=96 TimeMixer H=336
UVHF (one model) TimeMixer H=192 TimeMixer H=720

MSE vs TimeMixer

H96: -85.5% H192: -76.5% H336: -81.8% H720: -61.5%

Mean cross-horizon disagreement: TimeMixer 0.16 units | UVHF 0 (identical prefixes)

MSE uses each complete horizon; disagreement averages 6 pairs over their full overlaps. Selected case, not a population estimate.
