— Ground truth — TimeMixer H=96 — TimeMixer H=336
— UVHF (one model) — TimeMixer H=192 — TimeMixer H=720

MSE vs TimeMixer

H96: -86.0% H192: -83.3% H336: -64.4% H720: -78.0%

Mean cross-horizon disagreement: TimeMixer 2.93 units | UVHF 0 (identical prefixes)

MSE uses each complete horizon; disagreement averages 6 pairs over their full overlaps. Selected case, not a population estimate.
