Ground truth TimeMixer H=96 TimeMixer H=336
UVHF (one model) TimeMixer H=192 TimeMixer H=720

MSE vs TimeMixer

H96: -57.0% H192: -7.8% H336: -13.1% H720: -26.5%

Mean cross-horizon disagreement: TimeMixer 1.70 units | UVHF 0 (identical prefixes)

MSE uses each complete horizon; disagreement averages 6 pairs over their full overlaps. Selected case, not a population estimate.
